MOMENT CLARITY / THE CHANGE POINT

When the interaction changed

CLARITY VERDICT

They stayed warm with you. This time, they didn’t suggest a day.

You felt it when their reply slowed. We see the clearer shift when you asked to meet again.

WHERE IT FELT DIFFERENT

Their reply came more slowly the morning after your date.

WHERE THE EVIDENCE PUTS IT

You asked to see them again. They replied warmly and left the next date open.

BEFORE	You were each starting conversations and keeping them going. They had suggested two dates before this.
THE TURN	They sounded glad to hear from you when you asked to meet. They didn’t suggest a day.
AFTER	Over the next six days, you still heard from them in brief replies and reactions. They didn’t bring up meeting again.

MOMENT CLARITY / BEHAVIOR AND MEANING

What stayed and what changed

WHAT STAYED IN THE MESSAGES

You were still hearing from them through brief replies and reactions.

WHAT CHANGED IN THE MESSAGES

They’d suggested two dates before. After you asked this time, they left the day open.

WHAT TYMPAN SEES

They were still friendly with you. What changed was their role in making plans. Earlier, they suggested dates. This time, they kept in touch and left your invitation open.

CREDIBLE ALTERNATIVE

A busy week could explain why they kept in touch without suggesting a day. You heard from them in brief replies and reactions, but those messages don’t tell us why they left the invitation open.

EVIDENCE LIMITS

From the messages available, we can see what changed after you asked to meet. We can’t tell what was happening on their side that week.

MOMENT CLARITY / EVIDENCE THAT WOULD MATTER

What would change the interpretation

WOULD SUPPORT THE READ

If you keep hearing from them and they still leave the next date open.

WOULD CHALLENGE THE READ

If they bring up seeing you, offer a day, and show up.

STRONGEST CLAIM

The slower reply caught your attention. The clearer change came when you asked to meet and the next six days passed without them suggesting a day.

REMAINING UNCERTAINTY

Those six days tell you how they handled this invitation. We still can’t tell whether that will carry into your next exchange.

FACTUAL CORRECTION

If they actually offered another day during those six days, the change point needs another look. Their reply would have helped make a plan, which changes the basis for the finding.
